

Electric Cooperatives of Arkansas Ice Storm Restoration Update

Little Rock, Ark. – Feb. 18, 2009 – 4 p.m. – Four cooperatives are working to reestablish electric service to approximately 3,480 cooperative members. More than 98 percent of the 210,300 outages from the ice storm have been restored.

The Electric Cooperatives of Arkansas urge cooperative members to use caution both within and outside their homes. Candles, lanterns and temporary heating devices can pose a fire hazard. Home generators should be properly vented to prevent carbon monoxide poisoning, and they should be connected to home wiring through appropriate protective devices to prevent power from feeding back onto the utility's wires.

The cooperatives with outages include: Clay County Electric Cooperative, Corning; Craighead Electric Cooperative, Jonesboro; Mississippi County Electric Cooperative, Blytheville; and Petit Jean Electric Cooperative, Clinton. ***(A chart is attached for outages by cooperative)***

The public is cautioned to avoid any downed power lines and to report them immediately to local authorities.

The Electric Cooperatives of Arkansas comprise 17 electric distribution cooperatives; Arkansas Electric Cooperatives Inc. (AECI), a Little Rock-based cooperative that provides various services to the distribution cooperatives; and Arkansas Electric Cooperative Corp. (AECC), a generation and transmission cooperative. The distribution cooperatives provide electricity to approximately 490,000 members, or customers, in Arkansas and surrounding states.
